1. Purpose of Document

The purpose of this document is to briefly explain the test coverage and open issues of the **Auto Ticket Classification using Flow** project at the time of the release to User Acceptance Testing (UAT). The project automates the categorization of school IT helpdesk incidents (Wi-Fi, projector, password and slow-computer issues) with ServiceNow Flow Designer, by analyzing keywords in the incident's short description and description fields.

2. Defect Analysis

This report shows the number of resolved or closed bugs at each severity level, and how they were resolved
